V-1 and V-2 types. MARILA is about 12 kilometers by ordinary road from the railroad station of ORAVITA. The preparation of an area for this purpose on Mount PANOR is practicable because the summit is flat and is 500-600 by 300-400 meters in dimensions. This flat area is the reason that Mount PANOR was given its name.

Work began in August 1951. [REDACTED] at that time a regiment of mountain troops was camped there, and was employed in the work together with Rumanian specialists. There are no data on the nature of the work except that barracks were set up on the flat top of the mountain.
